

YOGENDRA YADAV

SENIOR REACT NATIVE DEVELOPER (6+ YEARS)

Indore, India | yogendra9644@gmail.com | linkedin.com/in/yogendra9644

PROFESSIONAL SUMMARY

Senior React Native Developer with 6+ years of experience building high-performance, real-time mobile applications for Android and iOS. Specialized in developing data-intensive systems with complex UI architectures, including custom data visualizations using D3.js and real-time dashboards. Proven track record of owning end-to-end application development, optimizing rendering performance, and delivering scalable production apps used by 10K+ users. Strong expertise in handling frequent state updates, multi-source data synchronization, and cross-platform inconsistencies in complex mobile systems.

KEY SKILLS

Languages: JavaScript, TypeScript | **Frameworks & Libraries:** React Native, Redux, Zustand

Visualization: D3.js, SVG, Custom Charting | **Mobile:** Android, iOS

Tools & Platforms: Git, GitHub, Azure DevOps, Firebase, Fastlane | **Testing:** Jest

Performance & Core: Memoization, Lazy Loading, Render Optimization, Debugging, REST APIs, Real-Time Data Handling, CI/CD

PROFESSIONAL EXPERIENCE

Cloud Energy Software — Software Developer (Mumbai, India | April 2021 – Present)

- Owned end-to-end development of multiple production-grade mobile applications in energy and utility domains.
- Designed scalable architecture and made key technical decisions including library selection and system design.
- Built custom D3.js + SVG-based charting system, replacing third-party libraries for better flexibility and performance.
- Optimized real-time dashboards handling high-frequency updates (10-second polling) with minimal UI lag.
- Improved rendering performance by reducing unnecessary re-renders using memoization and optimized component structures.
- Solved complex data synchronization issues across multiple UI representations and real-time updates.
- Reduced production issues and improved stability through debugging and enhanced logging mechanisms.
- Mentored 5 junior developers, enabling them to become production-ready within ~6 months.
- Conducted code reviews and provided technical guidance across projects to improve code quality.
- Contributed to additional applications by resolving technical challenges and supporting feature development.

Forebear Productions — React Native Developer (Indore, India | March 2020 – February 2023)

- Developed and maintained cross-platform mobile applications from development to production release.
- Built responsive and scalable UI components with optimized layouts and animations.
- Integrated REST APIs and handled asynchronous data efficiently.
- Improved application performance and stability through debugging and optimization.
- Collaborated with cross-functional teams to deliver reliable production features.

KEY PROJECTS

Duracell Energy (iOS App & Android App)

- Built a real-time energy monitoring system visualizing power flow between Solar, Battery, Grid, Home, and EV systems.
- Designed dual visualization modes: time-series dashboards and node-based energy flow network.
- Developed custom UI components for live power distribution using color-coded connections and state-driven rendering.
- Ensured consistent data representation across multiple UI formats from a single data source.
- Implemented real-time updates (10-second polling) with optimized rendering to prevent UI lag and instability.
- Built scalable D3.js + SVG visualization handling 150+ time-series data points per view.
- Resolved complex synchronization issues between real-time data updates and UI state.

Puredrive (iOS App & Android App)

- Developed and maintained scalable mobile application with modular UI architecture.
- Managed asynchronous data flows and API integrations for consistent user experience.

Stain Care Pro (iOS App & Android App)

- Built application from scratch with focus on performance and usability.
- Improved app stability through debugging and optimization across releases.

ACHIEVEMENTS

- Improved UI performance through render optimization and efficient state management.
- Delivered production applications with 10K+ installs and ~1K+ daily active users.
- Built real-time dashboards handling high-frequency data updates (10-second intervals).
- Mentored junior developers and improved team productivity through knowledge sharing.

EDUCATION

Bachelor of Engineering (Civil Engineering) — Sanghavi Institute of Management and Science (2015 – 2019)
