

YOGENDRA YADAV

Senior React Native Developer / Software Engineer

Email: yogendra9644@gmail.com | LinkedIn: linkedin.com/in/yogendra9644 | GitHub: github.com/yogendraCes |

Location: Indore, India (Available Remote)

PROFESSIONAL SUMMARY

Senior React Native Developer with 6+ years of experience building high-performance, real-time mobile applications for iOS and Android. Specialized in data-intensive systems, custom data visualizations using D3.js + SVG, real-time telemetry dashboards, and automated CI/CD release engineering. Proven track record delivering scalable production applications with 10K+ installs and ~1K+ daily active users.

WORK EXPERIENCE

Software Developer / Senior React Native Developer — Cloud Energy Software Permanent Direct Employee	Feb 2023 – Present
<i>Permanent direct employee leading end-to-end architecture, high-performance UI systems, and mobile release engineering.</i>	
- Owned end-to-end architecture and production delivery of flagship energy monitoring applications (Duracell Energy). - Built custom D3.js + SVG-based charting system, replacing third-party libraries for enhanced layout flexibility and 60fps rendering. - Mentored 5 junior developers, establishing code quality standards and enabling full production readiness within ~6 months. - Conducted technical code reviews and led CI/CD build automation with Fastlane across iOS (TestFlight) and Android (Google Play) release channels. - Solved complex data synchronization issues across real-time state updates, telemetry feeds, and interactive node network diagrams.	
React Native Developer — Forebear Productions 3-Year Tenure (Direct → CES Contract Staffing)	Mar 2020 – Feb 2023
<i>3-year engineering tenure at Forebear Productions progressing from direct mobile app development to full-time client contract staffing at Cloud Energy Software prior to permanent conversion.</i>	
Contract Staffing — Cloud Energy Software (CES)	Apr 2021 – Feb 2023
- Staffed full-time on contract to Cloud Energy Software, leading mobile development for client energy management applications (Puredrive, Stain Care Pro). - Optimized real-time dashboards handling high-frequency telemetry updates (10-second polling intervals) with minimal UI thread lag. - Improved rendering performance by reducing unnecessary component re-renders through strict memoization and component tree optimizations. - Integrated complex REST APIs and handled asynchronous multi-source data streams efficiently across iOS and Android builds.	
Initial Development — Direct Employee	Mar 2020 – Apr 2021
- Built foundational expertise in React Native, developing cross-platform mobile features from initial commit to production deployment. - Developed responsive UI components, dynamic navigation flows, and REST API integrations across Android and iOS devices.	

KEY PRODUCTION APPLICATIONS

Duracell Energy (Flagship App): Real-time energy management app visualizing power flow (Solar, Battery, Grid, Home, EV). Features dual visualization modes (dashboards & node networks), 10s polling updates, and custom D3.js/SVG charts handling 150+ time-series data points.

Puredrive: Production mobile application with modular UI architecture and asynchronous REST API integration.

Stain Care Pro: Cross-platform mobile application built from scratch with focus on performance, usability, and zero-crash release stability.

TECHNICAL SKILLS & MATRIX

Core Stack: React Native, TypeScript, JavaScript	State & Data: Redux, Zustand, REST APIs, Real-Time Data
UI & Graphics: D3.js, SVG, Custom Charting, Animations	Mobile Platforms: iOS (Xcode), Android (Android Studio)
DevOps & CI/CD: Fastlane, Git, GitHub, Azure DevOps, Firebase	Performance & Testing: Memoization, Render Optimization, Jest

EDUCATION

Bachelor of Engineering (Civil Engineering) — Sanghavi Institute of Management and Science (2015 – 2019)
